

Phoenix Designer

THE PERFECT OBJECT REPORT BUILDER FOR POWERSCHOOL

Designer puts the power back into building object reports. No more x-y coordinates, rulers or guessing when placing objects. The ability to see the report in complete view and drag objects into position makes designing a snap. Designer will literally cut the time it takes to create object reports in half, if not more, saving you valuable time. Our team developed this product as users, leaving no stone unturned when it comes to shortcuts and ease of use.

- View the object report
- Drag and drop editing
- Load custom fields and codes
- Build components to use over and over
- Save favorites
- Transcript Wizard
- Style Sheets
- Alignment tools
- Build multiple student reports on the fly
- Standard based report cards with ease
- Paste data to a table layout
- Input graphics
- Standards-based Report Cards
- High School Transcripts
- Activity Certificates
- Attendance Letters
- Trip Rosters
- More . . .

Build Unlimited Custom Reports

Forget the X and Y coordinates!

THE POSSIBILITIES ARE ENDLESS

Imagine the Possibilities...

"I have been using Designer for months now and it has been a very big help! Object reports are much easier with this program than from within PowerSchool!!"
(Terri B. - OK - Yahoo PowerSchool Users Group)

"I have been using the program for about a month, and it is worth every penny we paid for it. We seem to have a propensity for custom reports at my school, and Designer has saved me much time."
(Sally S. - PA - Designer User)

BE THE HERO IN YOUR DISTRICT
With Designer you'll quickly rise to hero status as your administrators and staff will be duly impressed with the speed you can whip out new reports and make modifications to old ones.

System Requirements

Phoenix Designer is available on:
Windows (XP or Greater)
