

THE PERFECT SOLUTION FOR ONLINE REGISTRATION

The amount of data collected from parents each year seems to be growing. The collecting, processing, entering into PowerSchool requires time and energy. SchoolForms automates the process and gives parents the ability to fill out all the forms electronically. School staff can then quickly review each student's information and confirm. SchoolForms then syncs with PowerSchool automatically each day. SchoolForms can be used to collect demographic data, medical information, immunizations, permissions, emergency contacts and electronic documents such as birth certificates, immunization and custody forms.

Online Student Registration

- Seamless integration with PowerSchool
- User defined and controlled forms, screens, and objects
- Sync automatically with PowerSchool, no importing or exporting
- Simple review process for school personnel to approve changes to student data
- Family accounts make for less duplication
- Unlimited user definable forms
- Field level formatting for dates, phone numbers, and smart casing
- Uploading of document by parents means less photocopying
- Use for returning students to verify information or for new student registration
- Use dual language feature to give parents the ability to fill the forms out in Spanish or other language

**LESS PAPERWORK
KEEPS EVERYONE SMILING**

BE THE HERO IN YOUR SCHOOL
